Technical Skills

- **Full-stack Development:** Proficient in React, Vue, Node.js, and Express for building dynamic web applications. Experience with Python (Django) and Java for backend development.
- **Databases:** Skilled in designing and implementing database solutions using MySQL, PostgreSQL, and MongoDB. Familiarity with ORMs like Prisma.
- **DevOps:** Expertise in version control with Git and GitHub. Experience with containerization using Docker-compose and deployment on cloud platforms like GCP and AWS.
- **Tools:** Proficient in VS Code and IntelliJ IDEA. Experience with CI/CD pipelines and automated testing frameworks.
- **Methodologies:** Agile practitioner with experience in Scrum and Kanban.

Soft Skills

- Proven track record of **creative problem-solving** and generating innovative solutions.
- Highly **adaptable** to fast-paced environments and changing priorities.
- Excellent **negotiation** and conflict resolution skills.
- Strong **team player** with excellent interpersonal and communication skills.
- Results-oriented with a proven ability to **manage multiple projects** and meet deadlines.
- **Customer-focused** with a strong commitment to delivering exceptional results.

Personal Projects

- **Portfolio:** A simple ReactJS-based portfolio showcasing a selection of my work.
  - https://jesusbloise.netlify.app
- **Full-Stack Application:** Developed a full-stack application using ReactJS for the frontend, Python (Django) for the backend, and PostgreSQL for the database.
  - https://github.com/jesusbloise/tu-empleado-perfecto
- **E-commerce Website:** Collaborated on a pizza e-commerce project, building the frontend with ReactJS and the backend with Node.js. Contributed significantly to the frontend development.
  - https://github.com/jesusbloise/desafio-pizzeria-hito8
- **Currency Converter:** Created a basic currency converter using JavaScript, CSS, and an external API. Implemented data visualization using charts.
  - https://github.com/jesusbloise/desafioAPIs
- **Web Game:** Developed an interactive web game using JavaScript and the Canvas API.
